MEDIA ADVISORY

Edison Students Learn about Solar Installation

What: Edison High students learn about solar installation

When: Monday, Nov. 5 2018
8 a.m.-noon

Where: Edison High School
540 E. California Ave. (93706)

Students from Edison High School’s Green Energy and Technology Academy will learn how to install solar panels and navigate electrical systems during a one-week intensive solar training from local solar company Grid Alternatives.

Students in the Green Energy and Technology Academy explore different types of energy with an emphasis on renewable energy sources.

“Through this training with Grid Alternatives, students will get hands-on experience in the growing field of solar energy,” said Superintendent Bob Nelson.
