October 21-25, all students in kindergarten through 12th grade will participate in Fresno Unified’s Cyber-Safety Week. The goal is that all students receive at least one cyber-safety lesson during this week. Lessons will help students to be strong and responsible digital citizens and use social media and other online tools safely.

“Many layers need to be considered when we talk about cyber safety. We want our students to avoid pitfalls in their cyber life and to improve their common sense when they are online. This curriculum can be helpful for any child since their skills and knowledge are put to the test every day with the use of technology,” said Superintendent Bob Nelson.
