Becky Pings, a teacher in the autism program at Ewing Elementary School, created several videos to help support families of kids with autism with home routines while schools are closed. The videos have a unique perspective -- Ms. Pings’ brother Adam, who has autism and Down syndrome, stars in the videos.

“Distance learning is a new reality for all of us, but videos like Ms. Pings’ let our families know they are missed and that we still want to support them. I am thankful that these videos are a resource for anyone who needs them, and on a personal note, it’s incredibly gratifying to see my
former Powers-Ginsburg students, Adam and Becky Pings, producing and starring in videos designed to reach every student in Fresno Unified,” said Superintendent Bob Nelson.
