Wi-Fi at Kirk Suspended due to Heat Advisory

Fresno Unified has had to suspend providing bus Wi-Fi at Kirk Elementary School due to the heat advisory. The pilot program was to have gone through Friday. On May 20, the district began parking two buses in front of Kirk to provide internet for students, who could sit in the shade and do their online schoolwork while campuses are closed. The project took advantage of the Wi-Fi capability of the district’s buses, an initiative rolled out in October 2016 so that students could do their homework and research while traveling to and from school.
