What does this program look like on a weekly basis?

Our goal is to personalize the program to meet your needs and a typical week includes both home-based work and school-based instruction. The number of days you must attend in a week is most likely fewer and the number of hours on those days is certainly fewer than at a traditional school. Even though the student may be at home, you will still have access to teachers through chat, email, phone, and Skype. During the school-based instruction, the student works 1:1 with the teacher and in small group format. Students must log into the system every day. Even when not scheduled to be at school, students are free to come and get support.

Students are required to participate in laboratory science “wet labs” that are scheduled regularly throughout the semester.
“Taking online courses for acceleration is allowing me to graduate early.”

-Roosevelt HS Student

What does FUSD offer?
Fresno Unified’s eLearn Academy is for students seeking a full-time online program. Students need to meet specific criteria. Our programs have flexible attendance options depending on student needs.

Our programs include:
- Grade 7-9 Cohort
- Grade 10-12 Independent
- Single courses for acceleration accessed through your high school counselor
- Site-based online courses

How do I get in?
Your first stop on your road to eLearn Academy is to talk with the counselor at your assigned high school to see if you qualify for the program.

Available Courses
eLearn Academy has a full four years of online curriculum that meets a-g for the University of California & California State University systems. In addition, the school is working toward offering dual enrollment courses (where the student would receive credit at both the high school and college levels).

Why choose online?
The number of different reasons for choosing online learning is large. Perhaps you have outside interests that require you to be outside of Fresno some of the time. Possibly you would like to graduate early. Whatever your reasons, our goal is to support you in your efforts.

What if I need more support?
When most people think of online schools, the thinking is that the student is 100% online. While we will have a tiny number of students where this is true, it’s more common that you will work part of your week at home and part of your week at the school. The typical student in our Grade 7-9 Cohort attends three days a week. The typical student in our Grade 10-12 Independent program attends two days a week. Need something different? Come in and talk with us and let’s see if there is an option available for you.

Credentialed teachers are available from Monday – Friday from 8:30 – 2:00 for chat (via the online program, email, phone, and face-to-face. In addition, other hours may be available by appointment.

Do you want more information?
eLearn Academy has regular parent/student informational meetings where you can learn more about the program without making any commitment.
