

## **AP CHEM 2018-2019**

Google classroom code: z3738ej

Welcome to AP CHEM!! I hope you will enjoy your summer and be refreshed and ready to work hard in August but I would like you to do one thing for me...

Use the code above to sign into our Google Classroom...once you are in then...

If you are looking for more to do over the summer then I would suggest...

Memorizing the polyatomic ions, You will find a list in our google classroom!

There is a quiz on the polyatomic ions the very first Friday of the first week of school, so if you take some time to memorize them over the summer then you will have a head start...

There is also a fun scavenger for extra credit if you are interested!

Thanks and have a GREAT summer!
